T-RUST

Rust Remover

T-RUST

T-RUST from Bridgepoint Systems is part of the 21st century generation of rust removers designed for carpets and fabrics. The T-RUST formula is designed to be safer for the user and fiber when compared to other harsh acid rust removers. **DO NOT MIX WITH OTHER CLEANING PRODUCTS.**

- No harsh acids are needed to remove the most stubborn rust stains from soft surfaces. T-RUST is much safer (for both user and fiber) than other rust removers on soft surfaces.
- Rust is a result of the reaction of iron oxide, oxygen or water (including humidity). T-RUST works differently on soft surfaces by molecular modification. This is the act of changing the rust so it is no longer visible. It requires no neutralizing only rinsing.
- **WORKS FAST** - No long waiting time for T-RUST to work. Simply apply, lightly agitate and in a few seconds the rust will begin to disappear.

Part Number:
CS12GL | CS12PT

RTU pH
3.0

Dilution Ratio:
RTU

Contents:
One U.S. Gallon (3.79 Litres)

Available in:
Gallons and 4 x 1 gallon cases,
Pints and 12 x 1 pint cases

DIRECTIONS

1. Test fabric for compatibility in an inconspicuous area.
2. Apply full strength to rust stain.
3. Allow a short time for T-RUST to work. Light agitation will spread the T-rust to all affected areas.
4. Thoroughly rinse area with water to neutralize any residues of T-RUST.

Remember, if the presence of iron oxide, oxygen and water are not changed then the rust will return.
