

INFERNO DEGREASING PRESpray

High pH Cleaner

APPLICATION CHART

Polyester Carpet ★

Tile & Grout ★

Concrete & Masonry ✓

★ = Recommended ✓ = Acceptable

RTU pH

12.5 - 12.9

Item #: 2644-2119

Available in Gallons & 4 x 1 gallon cases

Inferno Degreasing Prespray is a high pH cleaner fortified with alkalinity, solvents and surfactants including a soil attracting hydrotope. Both surfactants and alkalinity will emulsify oils and soils into micelles for easier extraction. Surfactants assist the penetration of the cleaning solution to the base of the fiber or into the surface of absorbent hard surfaces. A lot of soils find themselves at the base of polyester fibers since they do not absorb moisture. The particulate soil away from the fiber surface and base into the cleaning solution. This charged particulate soil includes soot and filtration soil. There are cleaning situations where the charged particulate soils dominate and the need for the special surfactant makes a significant difference in the cleaning result.

- Designed to be used as either stand-alone cleaner or booster.
- Outstanding at removing oily soils including soot from a variety of surfaces.
- Works well on polyester carpets, concrete, tile & grout and other surfaces not damaged by high alkalinity.

DIRECTIONS

Dilute one part Inferno to 4 parts of water for most difficult issues. As soiling issues diminish you can dilute up to 1 to 64 and expect good results.
